

Application process

1. Complete application package

- Fill and sign application form.
- Attach required documents.

2. Drop-off, mail, or email package to the Energy Branch.

3. Receive cheque within 12 weeks.

| Fuel | System | Criteria | Amount |
|----------------------------------|---|---|---|
| Renewable heating systems | | | |
| Heat pumps | <input type="checkbox"/> Air-source heat pump | <input type="checkbox"/> NEEP (cold climate) listed. See terms and conditions. | 40% of project costs up to a max. of \$8,000 |
| | <input type="checkbox"/> Ground-source heat pump | <input type="checkbox"/> ENERGY STAR®-certified. See terms and conditions. | |
| Wood | <input type="checkbox"/> Furnace/boiler | <input type="checkbox"/> CSA B415.10 or EPA-certified. See terms and conditions. | \$800 |
| | <input type="checkbox"/> Stove – pellet | | \$600 |
| | <input type="checkbox"/> Stove – cordwood | <input type="checkbox"/> Meets or exceeds emission standards. See terms and conditions. | \$300 |
| | <input type="checkbox"/> Fireplace insert | | |
| Water heating systems | | | |
| Water | <input type="checkbox"/> Drain-water heat recovery system | <input type="checkbox"/> NRCan-listed. See terms and conditions. | \$150 |

Required documentation

- Approved Government of Yukon or City of Whitehorse electrical inspection report.
- Itemized receipts or invoices with zero balance owing or noted as “paid in full” and initialed by supplier.
- NEEP / ENERGY STAR / CSA / EPA documentation. See terms and conditions.
- Emission standards documentation for wood appliances. See terms and conditions.

Applicant information

Payments will be issued in the applicant’s name only. Applicant’s name must appear on attached invoices and supporting documents where applicable. It is the applicant’s responsibility to ensure that any other parties that may have participated in the purchase or project are aware of this rebate application and approve of these terms.

Applicant name (printed with middle initial)

Mailing address City Postal code

Installation address (if different than above) City

Primary phone Email

Is this your primary heating appliance? Yes No

Is this heating appliance replacing an existing one? Yes No

If yes, describe your old appliance (fuel type, make, model, and efficiency):

If you installed a heat pump, did you maintain a fossil-fuel backup system? Yes No

If yes, describe the backup system (fuel type, built in backup with the heat pump or heat pump installed in series):

Did you receive funding from the Better Buildings program? Yes No

If yes, provide the legal property description. (This can be found in your Better Buildings Program Client Agreement.)

Lot number Quad Plan

Applicant signature

I agree to the terms and conditions of the Government of Yukon’s Good Energy program. I confirm that all measures have been completed as of the signature date below and that any accompanying receipts, invoices and documents are complete and accurate. I confirm that at the time of submitting this application, the product(s) purchased is located in the Yukon for use in the Yukon.

Terms and conditions

Definitions:

BBP – Better Buildings program

COP – Coefficient of Performance

CSA – Canadian Standards Association

EPA – Environmental Protection Agency (United States)

HSPF – Heating Season Performance Factor

MBtu – British thermal units

NEEP – Northeast Energy Efficiency Partnership

NRCan – Natural Resources Canada

Eligibility: Products, projects and services must be installed in buildings located in Yukon. Receipts and invoices and applicable inspection reports (see below) must be dated within one year of the date the application package is submitted to the Energy Branch. The date of the invoice is considered to be the date of the most recent payment on the invoice. Systems, appliances and products must be new. Used systems, appliances and products are not eligible for this rebate.

For heat pumps: Heat pumps are eligible for this rebate if they are installed in an existing home. A home that is 5 years or older is considered an existing home. A home that was recently built and is under 5 years is considered new and is not eligible for this rebate.

Air-source heat pumps must be listed by [NEEP](#) as cold climate heat pumps. The air-source heat pump must harvest heat from outdoor air to be eligible. The air-source heat pumps can be installed as ducted systems, non-ducted systems known as minisplit, in a series with an existing or a new furnace system, or with an electric thermal-storage unit.

Ducted systems must have a Region IV (Canada) heating season performance factor (HSPF) equal to, or greater than, 9 and a coefficient of performance (COP) at -15° Celsius equal to, or greater than, 1.75. Nonducted (minisplit) systems must have a Region IV (Canada) heating season performance factor (HSPF) equal to, or greater than, 10 and a coefficient of performance (COP) at -15° Celsius equal to, or greater than, 1.75.

Ground-source heat pump (also known as geexchange) must be [ENERGY STAR](#)-listed.

For heat pump installations, eligible expenses include:

- Equipment costs;
- Labour;
- Electrical upgrade (panel, wirings, new poles) costs;
- Construction costs; and/or
- Contracting and professional expenses related to the installation and required upgrades to supporting infrastructure.

Wood heating systems must meet [EPA New Source Performance Standards \(NSPS\)](#) or [CSA B415.10](#) (as amended in 2010) - see the [Code of Practice for Residential Wood Burning Appliances](#) contains the relevant information (see page 12). All wood-based heating systems (furnaces, boilers (also known as hydronic heaters), pellet stoves, cordwood stoves or fireplace inserts) must be listed by the [Environmental Protection Agency](#).

The heating system must meet or exceed emission standards. Wood stoves, pellet stoves, and fireplace inserts must have a particulate matter emission rating of 2.5 gram per hour or less. Wood boilers must have a particulate matter emission rating of 0.1 pounds per 1,000,000 British thermal units (lb/MBtu) or less. A furnace or a boiler tested using cordwood must have a particulate matter emission rating of 0.15 pounds per 1,000,000 British thermal units (lb/MBtu) or less.

Drain-water heat recovery system: must be [NRCan-listed](#).

Inspection reports: For all heating systems installed, applicants must submit an approved inspection report.

Applicants who are residents of the City of Whitehorse must submit:

- an approved inspection report completed by the City of Whitehorse for installing oil, propane, or wood-fueled heating systems.
- an approved electrical inspection report completed by the Government of Yukon for installing an air-source heat pump.
- an approved inspection report completed by the City of Whitehorse and an approved electrical inspection report

(where applicable) completed by the Government of Yukon for installing a ground-source heat pump.

All applicants residing outside of the City of Whitehorse must submit corresponding approved inspection report(s) completed by the Government of Yukon for any of the heating system installed.

Funding: The [Better Buildings program](#) offers low-cost funding to homeowners who complete qualifying energy upgrades to residential buildings.

Receipts and invoices: Receipts and invoices must be legible, itemized and include: purchase date, purchaser name, retailer/supplier name, brands and model numbers of items purchased, description and cost. Where applicable, supplied invoices must include the applicant's name on this form.

Every invoice must have a zero balance owing or be noted as "paid in full" and initialed by the supplier. Payment will be made to the individual or business identified on this form. It is the applicant's responsibility to ensure that any other parties that may have participated in the purchase or project are aware of this rebate application and approve of these terms.

Limits to program: The Good Energy program is renewed annually pending fiscal year budget allocation. **This program is effective from April 1 to March 31 of a fiscal year. The program expires on March 31 unless it is renewed.** Rebate offers are subject to program funding and revision and may change or end at any time. The Government of Yukon does not give rebates that are more than the product, project or service value. Some of the Good Energy incentives and rebates are funded in part by the Government of Canada's Low Carbon Economy Fund.

Applications and payment: Receipts, invoices and required documents must be dated within one year of the date application package is submitted to the Energy Branch. The Government of Yukon is not responsible for lost, late, misdirected, damaged, illegible, incomplete, or ineligible applications. Allow up to 12 weeks for payment. Payment may be done by direct deposit if you have been employed or under contract with the Government of Yukon.

For BBP clients: Residential clients who are receiving funding from the BBP may have their qualifying Good Energy rebate(s) automatically allocated to the principal of the BBP funding. The client must still apply for the applicable Good Energy rebate. Note that the funding principal may not be adjusted until the following calendar year and the funding term will not change.

Qualifying products: The Government of Yukon's Energy Branch relies on third-party standards to identify and validate energy efficient products, projects and services. In promoting these standards, the Energy Branch does not endorse any particular manufacturer, supplier, contractor or installer.

Personal information: Collection of this information is authorized by paragraph 15(c)(i) of the *Access to Information and Protection of Privacy Act* SY 2018, c.9 to determine whether you are eligible for a Good Energy rebate, issue payment, and provide you with updates to the Good Energy rebate program. For more information please contact the Manager – Energy Programs with the Energy Branch, Energy, Mines and Resources: 867-393-7063 or toll free: 1-800-661-0408 and ask to be transferred.

Disclaimer / no liability: The Government of Yukon Energy Branch's role is to incentivize the purchase of energy efficient products, projects and services. The Energy Branch is not responsible for product installation, the quality of work or service by a contractor, the completion of projects or the quality of products purchased. The Energy Branch does not guarantee energy saving results by approving an application. The Energy Branch is not responsible for claims by third parties about the Good Energy program, rebates and product eligibility.
