<sup>1</sup> Interprovincial migration represents movements from one province or territory to another, involving a change in usual place of residence. A person who takes up residence in another province or territory is an out-migrant with reference to the province or territory of origin, and an in-migrant with reference to the province or territory of destination. Net interprovincial migration is the difference between the number of in-migrants and the number of out-migrants. The number of interprovincial migrants is final up to 2017/2018 and preliminary for 2018/2019.

<sup>2</sup> Age on July 1<sup>st</sup>.

<sup>3</sup> The number of immigrants is final up to 2017/2018 and preliminary for 2018/2019.

<sup>4</sup> The number of emigrants is final up to 2016/2017, updated for 2017/2018 and preliminary for 2018/2019.

<sup>5</sup> The number of returning emigrants is final 2016/2017, updated for 2017/2018 and preliminary for 2018/2019.

<sup>6</sup> A non-permanent resident is a person who is lawfully in Canada on a temporary basis under the authority of a valid document (work permit, study permit, Minister's permit or refugee) issued for that person along with members of his family living with them. This group also includes individuals who seek refugee status upon or after their arrival in Canada and remain in the country pending the outcome of processes relative to their claim. The net non-permanent residents is final up to 2016/2017, updated for 2017/2018 and preliminary for 2018/2019.

<sup>8</sup> Age -1 represents persons born after July 1<sup>st</sup> and not included in age group 0 to 4 years.

Note: Annual figures represent the period of July 1<sup>st</sup> to June 30<sup>th</sup>; i.e., 2018/2019 figures cover the period from July 1, 2018 to June 30, 2019.

<sup>1</sup> In March 2012, the Yukon Rent Survey was expanded to include any building with three or more rental units. Prior to 2012, buildings with less than four units were excluded from the survey. Therefore, figures prior to 2012 are not strictly comparable to subsequent figures. Buildings with less than three rental units (i.e. houses, suites and duplexes) are not included in this table.

<sup>2</sup> Upper Whitehorse includes: Granger, Arkell, Copper Ridge, Ingram, Logan, Hillcrest, Takhini, Valleyview and Lobird/South Access. This aggregation has been made due to small numbers of surveyed buildings in these subdivisions. Due to non-response of a landlord in Hillcrest from September 2007 to September 2011, the figures for Upper Whitehorse units are not a complete representation of Upper Whitehorse units within that time frame.

Note: Beginning in 2014, the Yukon Rent Survey is being conducted on a semi-annual basis (April and October).

<sup>1</sup> The Yukon Rent Survey includes buildings with three or more rental units. Buildings with less than three rental units (i.e. houses, suites and duplexes) are not included in this table.

<sup>2</sup> *Upper Whitehorse* includes: Granger, Arkell, Copper Ridge, Ingram, Logan, Hillcrest, Takhini, Valleyview and Lobird/South Access. This aggregation has been made due to small numbers of surveyed buildings in these subdivisions.

<sup>3</sup> *Low-rise* units are in buildings with five or more units.

<sup>4</sup> *Store-top* units are residential units in buildings which primarily contain commercial space.

<sup>1</sup> The exploration work phase is defined as the search for, discovery, and first delimitation of a previously unknown mineral deposit or the re-evaluation of a sub-marginal or neglected mineral deposit in order to enhance its potential economic interest based on delimited tonnage, grade, and other characteristics. The phase is completed when a deposit has sufficient indicated mineral resources accompanied by a positive scoping study (preliminary economic assessment that justifies additional, more detailed, and costly deposit appraisal work).

<sup>2</sup> The deposit appraisal work phase is defined as the steps undertaken to bring a delimited deposit, by definition drilling, comprehensive tests, and planning, to the stage of detailed knowledge required for a complete feasibility study that will justify and support a production decision and the large investment required.

<sup>3</sup> Expenses that support work on and off mine sites; they are allocated to engineering, economics, and pre- or production feasibility studies, the environment, land access and field work. They also include associated general expenses.

Note: Exploration and deposit appraisal activities include only the search for and appraisal of deposits and do not include work for extensions of known reserves.
