## Employment

## HIGHLIGHTS

In 2020, Yukon's annual labour force was 22,900; a decrease of 1,200, compared to the revised 2019 number (24,100). The number of employed decreased by 1,500, from a revised 23,200 in 2019 to 21,700 in 2020.

Between January 2016 and December 2020, the lowest monthly unemployment rate was 1.7% in April 2018, while the highest rate was 8.3% in August 2020.

In 2020, of the 21,700 employed workers in Yukon, 50.2% were male (10,900) and 49.8% were female (10,800).

Comparing 2020 to 2011, the percentage of female workers decreased 0.8 percentage points from 51.0% to 50.2%.

In 2020, a total of 9,300, or 42.9%, of all working Yukoners were public employees employed by one of the four levels of government in the territory. Of the 12,400 workers in the private sector, 4,000 or 32.3% were self-employed.

<sup>1</sup> In March 2012, the Yukon Rent Survey was expanded to include any building with three or more rental units. Prior to 2012, buildings with less than four units were excluded from the survey. Therefore, figures prior to 2012 are not strictly comparable to subsequent figures. Buildings with less than three rental units (i.e. houses, suites and duplexes) are not included in this table.

<sup>2</sup> *Upper Whitehorse* includes: Granger, Arkell, Copper Ridge, Ingram, Logan, Hillcrest, Takhini, Valleyview and Lobird/South Access. This aggregation has been made due to small numbers of surveyed buildings in these subdivisions. Due to non-response of a landlord in Hillcrest from September 2007 to September 2011, the figures for Upper Whitehorse units are not a complete representation of Upper Whitehorse units within that time frame.

*Note:* Beginning in 2014, the Yukon Rent Survey is being conducted on a semi-annual basis (April and October).

<sup>†</sup> Use caution when analysing data due to high variance or a small number of rental units within the category.

<sup>1</sup> The Yukon Rent Survey includes buildings with three or more rental units. Buildings with less than three rental units (i.e. houses, suites and duplexes) are not included in this table.

<sup>2</sup> *Upper Whitehorse* includes: Granger, Arkell, Copper Ridge, Ingram, Logan, Hillcrest, Takhini, Valleyview and Lobird/South Access. This aggregation has been made due to small numbers of surveyed buildings in these subdivisions.

<sup>3</sup> *Low-rise* units are in buildings with five or more units.

<sup>4</sup> *Store-top* units are residential units in buildings which primarily contain commercial space.

<sup>1</sup> The exploration work phase is defined as the search for, discovery, and first delimitation of a previously unknown mineral deposit or the re-evaluation of a sub-marginal or neglected mineral deposit in order to enhance its potential economic interest based on delimited tonnage, grade, and other characteristics. The phase is completed when a deposit has sufficient indicated mineral resources accompanied by a positive scoping study (preliminary economic assessment that justifies additional, more detailed, and costly deposit appraisal work).

<sup>2</sup> The deposit appraisal work phase is defined as the steps undertaken to bring a delimited deposit, by definition drilling, comprehensive tests, and planning, to the stage of detailed knowledge required for a complete feasibility study that will justify and support a production decision and the large investment required.

<sup>3</sup> Expenses that support work on and off mine sites; they are allocated to engineering, economics, and pre- or production feasibility studies, the environment, land access and field work. They also include associated general expenses.

Note: Exploration and deposit appraisal activities include only the search for and appraisal of deposits and do not include work for extensions of known reserves.
