Notes: As of the 2002 Annual Statistical Review, seasonally adjusted three month moving average figures for the Yukon have been used. "Seasonally adjusted" refers to the technique of adjusting the "raw" figures to remove seasonal movements. Due to rounding, the sum of employed and unemployed at times does not equal the labour force figure.

Notes: Total income beneficiaries includes other types of benefits; the number of claims allowed represents the number of persons receiving benefits for a specific week each month regardless of when they received payment; the number of beneficiaries receiving total income benefits excludes employment insurance claimants receiving "employment and support measures" benefits. Quarterly and annual figures are averages of monthly figures. (Some zero values may actually be above zero, but are too low to report.)

Notes: *Total includes non-residents and residents; not included in this table are Canadians entering the Yukon from another province or territory. Figures from 1992 to June 2002 do not reflect a distinction between Yukon residents and other Canadians - they are reported together as other Canadians. As of June 2002 Canada Customs has re-instated the distinction between Yukon residents and other Canadians.

Monthly and quarterly figures may not equal annual figures due to revisions.

The large increase in some communities for June and July 2004, can be attributed in large part to fire-fighting operations.
