¹ Interprovincial migration represents movements from one province or territory to another, involving a change in usual place of residence. A person who takes up residence in another province or territory is an out-migrant with reference to the province or territory of origin, and an in-migrant with reference to the province or territory of destination. Net interprovincial migration is the difference between the number of in-migrants and the number of out-migrants. The number of interprovincial migrants is final up to 2015/2016 and preliminary for 2016/2017.

² Age on July 1st.

³ The number of immigrants is final up to 2015/2016 and preliminary for 2016/2017.

⁴ The number of emigrants is final up to 2012/2013, updated from 2013/2014 to 2015/2016 and preliminary for 2016/2017.

⁵ The number of returning emigrants is final up to 2012/2013, updated from 2013/2014 to 2015/2016 and preliminary for 2016/2017.

⁶ The net temporary emigrants is final up to 2012/2013, updated from 2013/2014 to 2015/2016 and preliminary for 2016/2017.

⁷ A non-permanent resident is a person who is lawfully in Canada on a temporary basis under the authority of a valid document (work permit, study permit, Minister's permit or refugee) issued for that person along with members of his family living with them. This group also includes individuals who seek refugee status upon or after their arrival in Canada and remain in the country pending the outcome of processes relative to their claim. The net non-permanent residents is final up to 2012/2013, updated from 2013/2014 to 2015/2016 and preliminary for 2016/2017.

⁸ Age -1 represents persons born after July 1st and not included in age group 0 to 4 years.

Note: Annual figures represent the period of July 1st to June 30th; i.e., 2016/2017 figures cover the period from July 1, 2016 to June 30, 2017.

Notes: Monthly figures are based on three-month moving averages. Estimates for Canada include all provinces but exclude estimates from Yukon, Northwest Territories and Nunavut, which use an alternative methodology. Nunavut estimates prior to 2008 should not be compared with more recent data due to change in coverage.

¹ In March 2012, the Yukon Rent Survey was expanded to include any building with three or more rental units. Prior to 2012, buildings with less than four units were excluded from the survey. Therefore, figures prior to 2012 are not strictly comparable to subsequent figures. Buildings with less than three rental units (i.e. houses, suites and duplexes) are not included in this table.

² *Upper Whitehorse* includes: Granger, Arkell, Copper Ridge, Ingram, Logan, Hillcrest, Takhini, Valleyview and Lobird/South Access. This aggregation has been made due to small numbers of surveyed buildings in these subdivisions. Due to non-response of a landlord in Hillcrest from September 2007 to September 2011, the figures for Upper Whitehorse units are not a complete representation of Upper Whitehorse units within that time frame.

³ Dawson City figures have been revised due to change in suppression guidelines.

⁴ Beginning in 2014, the Yukon Rent Survey is being conducted on a semi-annual basis (April and October).

[†] Use caution when analyzing data due to high variance or a small number of rental units within the category.

¹ Upper Whitehorse includes: Granger, Arkell, Copper Ridge, Ingram, Logan, Hillcrest, Takhini, Valleyview and Lobird/South Access. This aggregation has been made due to small numbers of surveyed buildings in these subdivisions.

² Numbers may not add up to the total due to rounding and vacancy rates may have been affected by small number of units.

¹ The exploration work phase is defined as the search for, discovery, and first delimitation of a previously unknown mineral deposit or the re-evaluation of a sub-marginal or neglected mineral deposit in order to enhance its potential economic interest based on delimited tonnage, grade, and other characteristics. The phase is completed when a deposit has sufficient indicated mineral resources accompanied by a positive scoping study (preliminary economic assessment that justifies additional, more detailed, and costly deposit appraisal work).

² The deposit appraisal work phase is defined as the steps undertaken to bring a delimited deposit, by definition drilling, comprehensive tests, and planning, to the stage of detailed knowledge required for a complete feasibility study that will justify and support a production decision and the large investment required.

³ Expenses support work on and off mine sites; they are allocated to engineering, economics, and pre- or production feasibility studies, the environment, land access and field work. They also include associated general expenses.

Note: Exploration and deposit appraisal activities include only the search for and appraisal of deposits and do not include work for extensions of known reserves.

Definitions:

BANKRUPTCY:

The state of a consumer or a business that has made an assignment in bankruptcy or against whom a bankruptcy order has been made.

A **consumer bankruptcy** applies to an individual with more than 50% of total liabilities related to consumer goods and services.

A **business bankruptcy** applies to any commercial entity or organization other than an individual, or an individual who has incurred 50% or more of total liabilities as a result of operating a business.

PROPOSAL:

An offer to creditors to settle debts under conditions other than the existing terms. A proposal is a formal agreement under the *Bankruptcy and Insolvency Act*.
